

WE ADD PROFITABILITY TO THE MIX

MEDIA RELEASE

For Immediate Release: April 15, 2021

For More Information: Stefan Siegels, 603-431-5547

ACT Co-Founder E. Max Hoene Announces Retirement

Concluding a successful transition, E. Max Hoene, co-founder of Advanced Concrete Technologies, Inc. retired March 31, 2021, after 32 years at the helm of the New Hampshire-based mixing/batching plant and equipment supplier. With his vast technical and industry knowhow, Max will continue to support ACT in a senior advisory position.

“Over the past five years we have executed a transition plan, where the new leadership has seamlessly taken over and is expanding ACT’s sales and service capabilities,” Hoene said. “Our customers can rest assured that ACT management and team members continue to remain strong in our commitment to customer service, product quality and industry-leading innovation along the way.”

Leadership will continue with Stefan Siegels, who has served as president since 2016. Reimund Richter, service manager with 30 years combined tenure at ACT and parent company Wiggert & Co., and Charles Watkins, sales and engineering manager, round out the team.

Advanced Concrete Technologies delivers the industry’s most technologically advanced concrete equipment solutions combined with world-class customer support. To learn more about outfitting a new plant or upgrading an existing facility, contact the ACT team at 603-431-5547.
